

Featuring a uniquely designed flexible frame, the 217 and 227 provide comfort and will seduce the most demanding snowshoers.
217 and 227 : 2 sizes to match floatation with snowshoe usage and the size of the snowshoer.

DECK

- Hourglass shape for an easier stride
- Flexible decks providing lots of floatation

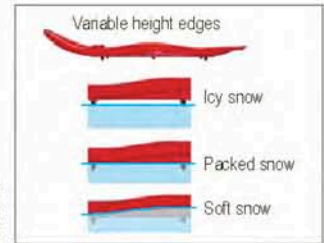

HOURGLASS SHAPE

TRACTION

- Stabilization beam
- Reinforced support tracks
- Variable profile
- 6 replaceable steel crampons

LATERAL TRACTION BARS

EDGES

DESIGNS

- 2 durable design options

A fast quarter-turn adjustment system easily adjusts shoes to the binding

Front teeth for maximum traction on steep terrain

Sound and Shock Absorbing System (SSAS)

Heel lift : facilitates walking during long climbs, reduces calf muscle fatigue

Tightening through a ratchet system for a secure and fast fit

Preset of the ankle strap allowing the comfort pad to center right on top of the shoe

Comfort PAD

Heel block: only for transporting or storing snowshoes
